Project Overview

TechSpace allows researchers from universities, research centres and other organizations to stay in touch with each other as well as with existing private sector companies or newly created start -up companies. offer information related to the latest research areas and new technologies according to user preferences, increasing the accuracy and effectiveness in obtaining information.

Vission

We deliver effective, efficient and accurate information and industries needs between researchers and investors, to support the process of researches and to boost the rate of research products commercialization.

Mission

Enhance international academic communications, encourage advanced research project and product developments, increase business profits via high efficiency and accuracy matching in a fast-growing resource pool.

TechSpace is an app that ...

- Assist the researchers to look for the suitable partner to conduct the research together.
- Look for sponsorship or fund from an investor or organization who have interest towards that particular research.
- Find the suitable research team to work on the research.
- Advertise the current project they are undergoing, or they have completed.
